Community Project Account Request

To our finance committee,

This is a letter to explain the intent for the application of funds from the Community Project Account to assist the Piedmont Park Fire District. Our project is to replace our current air monitoring meters that were awarded from a federal grant received eight years ago. The monitors have served the first responders and the community well in the past but have since become old technology and expensive to maintain. We currently have one of our meters out of service as it has reached the end of its life cycle. We are requesting the funds to replace the meters for the safety of our first responders and to our community we serve.

The meters are used for many different aspects of the first responder and emergency services to include monitoring the air during confined space rescue operations as well as checking the air for carbon monoxide at the residence of the tax payer when the CO detectors alarm in a residence. This equipment is vital to the operations of the fire service and for the safety of the first responder and the tax payer.

We thank you for the consideration and please call if there are any questions.

Sincerely,

A handwritten signature in black ink that reads "Travis Cone". The signature is written in a cursive, flowing style.
