Project Description:

Funding that will allow for the parade to be possible. Secondly to purchase new commercial holiday lights on the power poles on Geer Hwy. The commercial holiday lighting we now have are approximately 15 years old. These lights have become fragile and are deteriorating, the wiring and confetti both are dry rotted and are not safe to be powered. The new lights that we are asking for are led lights, which will consume less power and would be energy efficient, to include an approximate 15-year light longevity, thus reducing the yearly bulb replacement of traditional lights. In speaking with the manufacture of these lights, the owner has offered our community a 40 % discount on each light, as we do not have the funding to afford retail pricing. Below is a chart showing the retail pricing along with the discounted rate and totals.

Benefit project will provide the Community:

The benefit of this project will give the community lite holiday lights (on the power poles along Geer Hwy) for everyone to enjoy during the holiday season. It will also bring out many community members and neighboring communities to enjoy the Christmas season. Although this is a small community one of the largest events in our town is the Christmas parade. Children and adults enjoy riding through communities during the holiday season to see the Christmas lights, we feel like with new lighting it will attract more people to travel though our community, reflecting positivity to the County of Greenville.
