

Explanation of Millage Increase:

For fiscal year 2016-2017, Boiling Springs Fire District (the "District") asks that millage of 25.7 mills be included on the tax bills of the residents of its service area. For fiscal year 2015-16, the District imposed 23.7 mills, which is the same number of mills levied for the previous two tax years. This is an increase of 2.0 mills which is needed to fund: increased operational costs, increased healthcare costs, and other costs mandated by other governmental entities.

The value of a mill for the District equals \$157,585.

Section 6-1-320(A)(1) of the Code of Laws of South Carolina, 1976, as amended (the "Code"), allows a local governing body to increase the millage rate imposed for general operating purposes above the rate imposed for such purposes for the preceding tax year only to the extent of the increase in the average of the twelve monthly consumer price indices for the most recent twelve-month period consisting of January through December of the preceding calendar year, plus the percentage increase in the previous year in the population of the entity as determined by the Office of Research and Statistics of the Revenue and Fiscal Affairs Office.

Furthermore, Section 6-1-320 suspends its restriction on annual increases of operating millage in two additional circumstances - to maintain a reserve account and in the event of a deficit in the previous year. The District maintains a rolling reserve of 25% to maintain financial security throughout the year.

In order to protect its financial stability, the District is requesting a "lookback" millage adjustment equal to the allowable combination of CPI and population growth for Fiscal Years 2014-15, 2015-16, and 2016-17 resulting in an increase of 2.0 mills.
