APPLICATION FOR COUNCIL GRANT ASSISTANCE WITH LIFE SAFETY WATER LINE INSTALLATION

Applications will be based on health and life safety issues that include contaminated/non-potable wells, dry wells and fire protection. Greenville County Public Works Department, Engineering Division, will take applications for Council Grant Assistance with Life Safety Water Line Installation. Applications will be reviewed and scored by the Facilities Project Manager, Assistant County Administrator for Public Works, and the Engineering Division for completeness and criteria and will be submitted to Public Works, Planning and Development Committee for consideration on a first come, first serve basis.

This is a 50/50 grant program; therefore, the County of Greenville, upon approval by County Council, will provide 50% and the applicant will provide the other 50% for the installation of the water main and/or fire hydrant down the public road. The applicant has 60 days to secure their portion of the funding and remit to the County of Greenville. The respective property owners are responsible for the tap/meter fee and connection to the dwelling.

Applicant's Name Betty H. Long Phone Number 864-770-3890
Street Address 941 Tubbs Mountain Rd. Travelers Rest, S.C. 29690
Mailing Address (if different) —

Specific detailed information concerning this request:

Understanding Your Bacteria Test Results

Your well water sample was tested for total coliform bacteria. This group of bacteria is often used as a general indicator of the cleanliness of food and water. If total coliform bacteria were present in your sample, DHEC also checked your sample for E. coli bacteria. E. coli is a bacteria found in human and animal waste.

An explanation of your water sample results can be found below.

Your test result looks like this:

No coliform bacteria of any kind were found in your water sample. Your well **does not** have a bacteria problem at this time.

Total Coliform		E. Coli	
Present	Absent	Present	Absent
	✓		✓

Your test result looks like this:

Total coliform bacteria were present in your water sample, however **no** E. coli bacteria were found in the sample. Therefore your water **does not** present an immediate health concern. Total coliform bacteria are common in soil, so its presence in your sample could be a sign that soil or surface water has entered your well. Make sure your well is sealed to stop soil or surface water from entering the well. You can disinfect your well to remove bacteria by closely following the enclosed instructions. If you disinfect your well, you can collect another sample to be tested for bacteria 7-10 days after completing the well disinfection.

Total Coliform		E. Coli	
Present	Absent	Present	Absent
✓			✓

Your test result looks like this:

Both total coliform bacteria **and** E. coli bacteria were found in your water sample. E. coli can cause diarrhea which can lead to other health problems. The presence of E. coli bacteria indicates there may be other organisms present in your water that could cause disease. **DO NOT USE YOUR WELL WATER FOR DRINKING OR COOKING BEFORE DISINFECTING YOUR WELL.** Immediately disinfect your well by closely following the enclosed instructions. Collect another sample 7-10 days after completing the well disinfection. **IF YOU MUST USE THE WATER BEFORE DISINFECTING YOUR WELL, BOIL IT FOR 1 MINUTE TO KILL THE BACTERIA.**

Total Coliform		E. Coli	
Present	Absent	Present	Absent

Private Individual Residential Well Bacteriological Analysis Request

Charge Code: WSR

MNO C-24

Please Note: Not for use on public water systems. Please contact your local DHEC office for public water concerns. The report represents the bacteriological quality of the water sample submitted to the DHEC Laboratory. **This report DOES NOT represent approval of water system construction or approval for real estate loans.**

Please complete all applicable white areas of form and use one form per sample. Areas in gray are for DHEC/Laboratory use only.

Mailing Name: Martha Long POA for Betty Long Daytime Telephone Number: (864) 420-4106

Address: PO Box 1294
City: Taylors State: SC Zip: 29687

Sample bottle should contain white crystals of sodium thiosulfate. See Instructions.

Well ID SCW: ?

Bottle lot #: AP010V Exp. 1-12-21

Personal information provided on this document is subject to public scrutiny or release.

Sample Information:

Date Collected: 11 / 5 / 18
Time Collected: 11:50 am
Collected by: Martha Long POA
County: Greenville

Sample Type (if known):
 1st Time Sample
or
 Repeat ?

Results will be mailed, not faxed or emailed by the Laboratory.

Note: This test is for Total Coliform bacteria. If this bacteria is detected, the sample will be further tested for *E. coli* bacteria. *E. coli* bacteria can not be present if there are no Total Coliform bacteria present.
