Hello,

I do! One of our stops—the “510 & 601 Connection” is located within Mauldin and serves as a transfer point between the two routes. This stop is currently slated for a shelter under our RAISE funding program, but we are seeking funds to add digital signage to key stops such as this one. Your funds could be utilized to purchase a sign to be added to this stop.

In 2021, GTA conducted a Customer Demographics Survey in which 15% of Fixed Route riders identified as 65 years of age and older and 17% of Fixed Route riders reported that they have a disability that affects their ability to travel. Digital signage is an important piece of planned upgrades at this stop as it would be easy-to-use and may include an ADA-compliant text-to-speech component (a benefit to all riders, but particularly those who identify as seniors and those living with a disability). With the press of a button, individuals will have immediate access to information such as maps or real-time departures or real-time alerts, thereby enhancing accessibility in ways that a static display simply cannot.

Here is an image of a sample sign:

Please let me know if you have any questions.

Best,

Good Afternoon Councilwoman,

I hope you are well.

I have copied Kayleigh, I suspect she has a project or idea?

James – I have \$10K of district funds to spend. Could we do some bus stop improvements in my district? Hope all is well!

Sincerely,
Liz
