The Interest rate I will pay may change on the first day of April , 1985, and on that day every 12th month thereafter. Each date on which my interest rate could change is called a "Change Date."

If the index is no longer available, the Note Holder will choose a new index which is based upon comparable information. The Note Holder will give me notice of this choice.

The first Index figure for this note is 10.530%. It is called the "Original Index."

The Original Index plus a margin of 2.5 % (after rounding the result up to the nearest 1/8 of 1%) is called the "Adjustment Base Rate."

Before each change date, the Note Holder will calculate my new interst rate by calculating the difference,
If any, between the Current Index and Original Index. If the Current Index is higher than the Original Note Holder will add the difference to the Adjustment Base Rate. If the Current Index is lower than the Original Note Holder will subtract the difference from the Adjustment Base Rate. The Note Holder will then round Index, the Note Holder will subtract the difference from the Adjustment Base Rate. The Note Holder will then round Index, the Note Holder will subtract the difference point (0.125). Subject to the limits stated in the result of this addition to the nearest 1/8 of 1 percentage point (0.125). Subject to the limits stated in Section 4 (D) below, this rounded amount will be my new interest rate until the next change date.
