Underground Detention Certification Form

Project Name: _____   Permit Number: _____

1. Contact the project's assigned Inspector at least one (1) day prior to the start of construction on any underground detention, including excavation. Underground detention installation must be observed by the Inspector.
2. Provide the Inspector with an estimated schedule for the placement of any of the following: geotextile, stone, storage media, piping, soil, etc.
3. Provide the following information about the underground detention.

Required Photos	Photo #	Registered Professional's Initials & Date
Photos showing the bottom of the basin after installation of geotextile and/or impervious liner **		
Photos showing the installation of pipes/storage units before stone fill is added **		
Photos showing the installation of pipes/storage units with tops showing and stone filled around them **		
Photos showing outlet structure, including internal weirs and/or orifices, and outlet pipes (with tape measure as size reference) pipes & outlet structure		
Photo(s) showing the completed installation with stone to finished bed elevation and geotextile in place (prior to backfill) **		

Greenville County Land Development Inspector required

By signing this form, the registered professional indicated below certifies that they, or a designee, were present during the required installation associated with the underground detention, and that, to the best of their knowledge, information, and belief, these measurements are in general accordance with the Approved Plans/Details.

Please note that the elements listed above must be reflected on the project's As-built survey. The Project's Construction Certification Package, which must be submitted with the As-built Survey, must include digital copies of all BMP Construction Certification Forms (one per type of BMP) and digital copies of the photographs required on these forms.
