	ce: (write below or attac	ch) duce the front setback requ	uirements by 1.4	feet on a 10 foot section
		e. Just the 10 foot section		
garage is over th	e setback line by 1.4 fee	t, the remainder of the hor	me is behind the	setback lines as shown
on the attached t	foundation survey. Our f	oundation contractor made	e a mistake wher	he laid out the footings
and did not take	into account the garage	bump out. By the time this	s came to our att	ention, the foundation
had been poured	and the house was alre	ady framed. As it would be	e very costly to c	correct at this point, we
humbly request a	a variance to reduce the	front setback line.
